

Divine Acoustics

ELECTRA

GENERATION 3

AVANTGARDE
&
ELEGANCE

...this is a creation of a true passionate who made these speakers for other aficionados and in particular for those who can't afford high-end/priced products.

These speakers take us on a different journey. They offer a trip into world of music where what matters most are colors, dynamics, naturalness and "freshness" of the sound.

It's a sophisticated performance, open, effortless and most of all – very clean.

It is a well thought-through, wonderfully made speaker for true connoisseurs.

Make your Electra fit perfectly the style of your living room.

Select the shape of the front leather panel, choose the finish: luxury high gloss or matt, match the color of the tweeter to your preferences and even choose the color of magnetic grills.

All this will create a unique pair of Electra hand-built especially for you.

AVANTGARDE ELEGANCE

luxury high gloss:

Snakewood, Black Abyss, White,

matt veneers:

Rosewood, "Latte" Venge,

matt melamines:

African Ebony, Wild Zebrano.

Not all versions/finishes are available in all markets. Contact your local dealer for specialist range details.

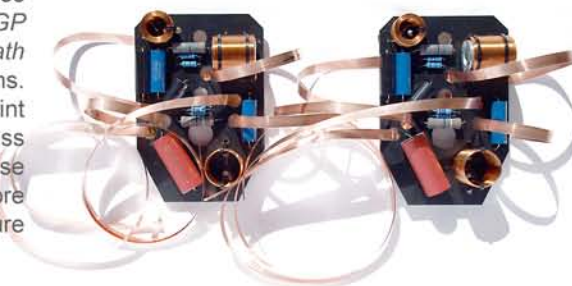

Treble are reproduced by a custom made 25mm (1in) silk dome driven by magnetic system with two chambers. They are designed to dampen resonances and to match tweeter's sensitivity with woofer. The magnetic motor is grounded and uses *BAD (Basket Accurate Dampening)* system which optimizes performance of a driver. As a safety, a steel arch has been designed to protect tweeter from external damage.

Bass and midrange are reproduced by a 13cm (5in) woofer. It combines a coated paper cone, that has very good resonance damping properties, with a very light and rigid one-layer carbon fiber, that improves impulse response. Woofer sports a vented magnetic system protected by a copper ring, which additionally stabilizes magnetic field. Its basket is grounded and *BAD* system optimizes performance.

The 2nd order crossover uses *Divine Acoustics'* proprietary *SGP (Single Ground Point)* and *RFpath (Resistors Free path)* systems. Assembled by hand in point-point technology it contains a high class *Jantzen Audio* capacitors, precise metallized resistors and air core coils. All connections are a pure copper ribbons.

Technical data:

- Impedance: 8 ohms;
- Efficiency: 87 dB;
- Recommended amplifier power: 8 – 60 W;
- Recommended listening room area: 12 – 20m² in stereo mode;
- Frequency response: 40 Hz – 20 kHz (incl. bass-reflex port);
- External dimensions: height: 107cm (42 in); width: 27 cm (10,6 in); depth: 12 cm (4,7 in);
- Shipping weight: 2 x 17 kg (2 x 38 lbs);

tweeter rings:
gold or steely.
